

Leading European manufacturer  
of fireplace stoves and fireplace inserts

# One fireplace, unlimited options...

## VARIANT R/L steel – design accumulation fireplace

Even with such thing as a fireplace, you can now use your imagination and aesthetic feeling. Thanks to the new design fireplace Romotop VARIANT R/L. As a first step, you choose the corner orientation and then the limits are up to you: upper segments, lower segments, additional accumulation – according your wishes.

- Choice of 3 additional modules
- Easy assembly without using any screws
- Possibility of mounting accumulation elements above the firebox
- Long-term heat radiation
- Corner glass door for left and right version
- Slim design, elegant and space-saving
- Casing – decorative sheet metal plates
- Innovative flue gas lines – DOUBLE SPIN
- Combustion chamber with cast iron grate
- Genuine chamotte used inside the chamber
- Primary and secondary air settings managed by one element
- Possibility to connect external air intake
- High quality of used materials and first-class workmanship
- Optional purchase of accumulation elements
- Meets EN 13 240, DIN+, 15a B-VG, Bimsch V1/2 standards
